Rules that Guide Class Discussion: To create an environment that fosters open examination of ideas, we must be well-prepared for class, express ourselves effectively, respect and listen to everyone's ideas, challenge each other to think critically, and correct mistakes or misunderstandings in a positive and encouraging manner. With that in mind, here are some guidelines for class discussion:

1. *No question or opinion is "stupid."* We must start where we are at, and undoubtedly each person in this room is "at" a different point in their understandings and experience.
2. *We will listen to each other with respect.* The proper response to comments you do not understand or agree with is to ask the speaker to explain and to probe for deeper understanding.
3. *We not only accept, we encourage diverse viewpoints and opinions.* Critical thinking comes from examining many different dimensions of any topic. Students are encouraged to raise points and examine positions that they do not agree with, in attempt to foster a tradition of critical thinking.
4. *There is no room for anger when discussing academic ideas and issues.* When you feel an emotional response to an issue, step back and examine the values or beliefs inside you that were validated or threatened by someone else's comment. Use those points of emotion as a window to better understand the cultural factors that are embedded deep within yourself.
